BEICHEN ZHANG

(Open to work in industry and academia: research scientist in climate impacts, spatial data scientist)

beichen@huskers.unl.edu ◇ GitHub ◇ LinkedIn ◇ NDMC ◇ My Website

PERSONAL PROFILE

Ph.D. candidate studying impacts of climate extremes, with 5+ years of experience in remote sensing and applied climatology, and 3+ years in data science and machine learning using Python, R, and related packages such as scikit-learn and PyTorch.

EDUCATION

Ph.D. in Natural Resource Sciences, University of Nebraska-Lincoln — Expected Fall 2023
Spicialized in Climate Assessment and Impacts, minor in Statistics
Dissertation topics: Monitoring and Assessing Drought Impacts using Machine Learning

M.S. in Natural Resource Sciences, University of Nebraska-Lincoln — 2017 - 2019
Spicialized in Climate Assessment and Impacts
Thesis: Investigation of GRACE-derived Information on Forest Drought Stress Across the Contiguous U.S

B.S. in Geographic Information Science, Northwest A&F University (Yangling, China) — 2013 - 2017

RESEARCH EXPERIENCE

Graduate Research Assistant — August 2022 - Present
Daugherty Water for Food Global Institute, National Drought Mitigation Center — *Lincoln, NE*

- Research fellowship from the DWFI. Developing studies on associations between climate extremes and mortality using ML and causal inference, collaborating with researchers from environmental health and statistics.

Research Intern — Jun 2022 - Aug 2022
Frontier Development Lab USA (Funded by NASA and DOE) — *Mountain View, CA*

- The core researcher of an interdisciplinary research team studying wildfires using multispectral satellite imagery and ML. Built a self-supervised model to detect changes of the burned areas and evaluate burned severity.

Graduate Research Assistant — August 2019 - May 2022
National Drought Mitigation Center — *Lincoln, NE*

- Developed a study to investigate causal relationships between climate extremes and social unrest in South Asia.
- Developed a study to identify drought impacts from Twitter data using fine-tuned BERT.
- Built an explainable ML framework to predict and assess complex drought impacts using XGBoost and SHAP.

TEACHING EXPERIENCE

Applications of Remote Sensing in Agriculture and Natural Resources, lab instructor — Jan 2022 - May 2022
Introduction to Remote Sensing, lab instructor — Aug 2021 - Dec 2021
Introduction to Geospatial Technologies, lab instructor — Aug 2019 - May 2021
